

What We Do

Marycare's singular mission is to *break the vicious cycle of poverty* in communities marginalized and isolated because of their ethnic and social economic status. Small Scale Loans is one of the programs we sponsor to carry out our mission.

Small Scale Loans

- In many developing countries, unfair and unjust loan practices abound. There is an interest rate of approximately 20% on any money borrowed, making it almost impossible for borrowers to repay their loans.
- Through Small Scale Revolving Loans, Marycare has helped over 200 mothers put food on the table for their children, provide for their families and build their own enterprises and a sustainable future.
- The loan provides these women with a tool to achieve self-reliance.
- Most of the recipients of the loan have proven themselves to be credit worthy and capable of creating a stable source of income and at the same time repaying the loan.
